EDUCATION

University Of Central Florida

Aug. 2021 – May 2026

Bachelors in Computer Science

Orlando, FL

- Related Coursework: Data Structures and Algorithms, Processes for Object Oriented Software Development, Systems Software, Web-Based Information Technology, Introduction to Robotics

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, HTML/CSS, Haskell, C++

PROJECTS

Kingdom Of Greed | *Unity, Aseprite*

- Developed a **top-down dungeon crawler** in Unity where players control a goblin rebel navigating procedurally generated kingdoms to challenge a tyrant.
- Designed and implemented **dungeon generation**, enabling replayable, dynamic levels utilizing seeds
- Created a **custom animation system** using Unity Animator and hand-drawn sprite sheets for player and NPC movement, attacks, death, and idle states.

Gachapon Robot | *C++, Arduino*

- Collaborated in a **multidisciplinary team** to design 3D-printed components, electrical systems, and user interaction logic.
- Developed and implemented code for Arduino and laptop integration to manage coin detection, prize dispensing, and **interactive displays**.
- Designed and executed the **interaction algorithm** that identified peak user interaction times to optimize callout behavior, enhancing user engagement.

ChristellePhotography.com | *React, Next.js, GitHub Pages, JavaScript, HTML/CSS*

- Designed and deployed a **responsive photography portfolio** using Next.js and React, featuring category-based **dynamic image galleries**.
- Implemented **static site generation** (SSG) and configured export settings for deployment on GitHub Pages with a custom domain.

ShadeSmith | *Flutter, Dart, Python, Google Cloud(Vision, ADK, Gemini), RGB to CMYK Mapping*

- Built and deployed a functional prototype within 36 hours at a **hackathon**: an **AI-powered mobile app** that scans real-world shades and generates paint mixing “recipes” tailored to user inventory, with intelligent pigment substitutions, using a Flutter UI, Python backend, and Google Cloud Run architecture.
- Integrated an **image-processing pipeline** using Google Cloud Vision for RGB extraction, converted to CMYK for realistic pigment mixing, and leveraged **Gemini agents** for recipe generation.

EXPERIENCE

Software Developer Intern

Current

The Health Carpenter Primary Care

Orlando, FL

- Collaborated with healthcare staff serving over **400 patients** to translate operational needs into maintainable, privacy-focused software solutions that improved clinic communication and workflow efficiency.
- Engineered digital tools to streamline patient engagement, including **automated reminder notifications**, while adhering to HIPPA regulations.

Bloomberg Tech Lab on Campus

Sep. 2024

University of Central Florida

Orlando, FL

- One of 40 students selected to collaborate with Bloomberg engineers in a small group setting to build an application using **RabbitMQ** and **Docker**.
- Utilized **Python** to design and implement a robust **message queue system** using RabbitMQ, enhancing **real-time data processing** and communication between producer and consumer components.

EXTRACURRICULARS

SHPE (Society of Hispanic Professional Engineers)

2024-Current

Tech Committee, Pro Dev Committee, MentorSHPE Mentor

- Participated in the Professional Development Committee, supporting career development by critiquing resumes, interview responses, and elevator pitches.
- Served as a Mentor in the MentorSHPE program, providing guidance and support to five undergraduate students in computer science, focusing on academic achievement and career development.
- Contributed to the Tech Committee, providing guidance and support in various technical projects.
